**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-8, 10-14, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiegand et al (LaGrange Multiplier Section in Hybrid Video Coder Control) for the same reasons as set forth in Section 5 of the last office action, dated 6/13/05.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2613

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 2, 9, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiegand et al in view of Yang et al (Blocking Effect Removal Using Regularization and Dithering) for the same reasons as set forth in Section 8 of the last office action, dated 6/13/05.

### ***Response to Arguments***

6. Applicant's arguments filed 12/19/05 have been fully considered but they are not persuasive. Applicant asserts on pages 9-10 of the Remarks that Wiegand et al fails to disclose reducing the effects of outliers. However, Section 2 of Wiegand et al discloses the concept of such minimizing of distortion values. One of ordinary skill in the art would have had no difficulty in recognizing that the outliers are the values that contribute to distortion. By minimizing distortion, Wiegand et al discloses such values are effectively reduced.

Applicant also asserts on pages 10-11 of the Remarks that Wiegand et al fails to disclose slow varying Lagrangian multiplier. However, Figure 2 of Wiegand et al illustrates the concept of such multipliers varying at slower rate (e.g. bottom curve) than other multiplier for an encoding mode.

Applicant finally asserts on pages 12-13 of the Remarks that Wiegand et al fails to disclose clustering the Lagrangian values. However, Section 3 of Wiegand et al discloses the concept of such clusters of seven values in the determination of the best settings.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
